of two digital courses in Accounting and Finance and a companion in-person experience working hands-on with the faculty and your classmates with data and real world problems to identify solutions and opportunities.

Accounting for Decision Making | Coursera

In cost accounting, a decision model is a process for making important decisions. Most types of organizations (businesses, sports teams, and governments, to name a few) have a formal process for making choices. Some of this, of course, is common sense. Here are the steps in a typical decision model: Define the problem. Gather information.

decision making process throughout this cycle. Students will learn how to base these decisions on two kinds of accounting information -- managerial and financial.

Accounting: Information for Business Decisions - Billie M ...

In management accounting, decision-making may be simply defined as choosing a course of action from among alternatives. If there are no alternatives, then no decision is required. A basis assumption is that the best decision is the one that involves the most revenue or the least amount of cost.
