Auditing Calibration: What you need to know!

It's better to have someone who understands calibration to do the audit, otherwise the auditor should have some training on calibration, especially since this is a TS based system. That means the auditor will have to be familiar with the MSA too. Is this a new calibration system? If you are auditing the calibration system for the first time, then you have a big audit to plan. just taking a simple 'turtle diagram' and expecting it to cover all the requirements is not going to be very effective.

How to Internal Audit the Calibration Process
