Captiva Diesel Engine Warning Light

The Chevrolet Captiva / Holden Captiva engine warning light, also known as engine malfunction lamp (MIL) comes on if a fault exists in the emission related components or related sub systems. The check engine light will remain on as long as the Engine Control Module (ECM) detects the fault.

Chevrolet Captiva / Holden Captiva Dash Warning Lights ...

Chevrolet Captiva check engine warning light - If the engine symbol is illuminated in your Chevrolet Captiva during normal operating conditions, it indicates a serious fault/malfunction in the engine system. In most cases the fault will be caused by a broken/faulty sensor like o2 sensor, map sensor, maf sensor, camshaft sensor or other.

Chevrolet Captiva Car Warning Lights - Diagnostic World

Here are some of the most typical problems that can make your Captiva's reduced engine power warning come on: Throttle Body. This is one of the most common reasons the reduced engine power light comes on. If the ECU isn't getting the proper voltage response from the throttle body, it can't be sure of how much it'll really accelerate your Captiva from the gas pedal input. At this point, it turns on the reduced engine power mode in order to keep the vehicle from running away from you ...

Engine Warning Light (or Check Engine Light, CEL) If the engine warning light illuminates, then it's likely to be accompanied by a mechanical symptom. Either a sudden loss of power (which suggests the car has gone into limp mode to protect itself), or a stutter, or anything that suggests the engine is not behaving as normal.

Common car dashboard warning lights explained | Practical ...

Engine Warning Light (or Check Engine Light, CEL) If the engine warning light illuminates, then it's likely to be accompanied by a mechanical symptom. Either a sudden loss of power (which suggests the car has gone into limp mode to protect itself), or a stutter, or anything that suggests the engine is not behaving as normal.

It's got nothing to do with the fuel you're using; the Captiva is fine to run on regular unleaded. You need to have a mechanic experienced in diagnosing problems with modern engines check it out for you. Clearly the dealer's mechanics are not up to the task.

Holden Captiva 2010: Engine light - FAQ | CarsGuide

If the engine isn't able to burn the soot due to a short trip, the computer will then turn on the filter warning light to warn the driver that the soot level is building up. When you first see the light, you can resume normal driving, but when you get a chance, take the car onto the highway and drive it for around 10 minutes at 40+ MPH.
