Companion Site for Disorders of the Auditory System ...

Hearing impairments are caused by abnormalities of structure and/or function in the auditory system, which are often called lesions. Using this terminology, a hearing loss may be viewed as one of the manifestations of a lesion somewhere in the ear, as are other symptoms such as pain, ringing in the ears, and dizziness.

Auditory System and Related Disorders | Ento Key

Types of central hearing loss include aphasia (Wernicke's aphasia), pure word deafness, auditory agnosia, cortical deafness, and auditory hallucinations. Another more common form of central hearing loss is associated with presbycusis, or age-related hearing loss.
