End Games In Chess

In chess and chess-like games, the endgame (or end game or ending) is the stage of the game when few pieces are left on the board. The line between middlegame and endgame is often not clear, and may occur gradually or with the quick exchange of a few pairs of pieces. The endgame, however, tends to have different characteristics from the middlegame, and the players have correspondingly different strategic concerns.

Chess endgame - Wikipedia

One thing that really separates the final stage of chess from the rest of the game is King play! Every great endgame player in history not only understood the importance of King activation, but they anticipated precisely when the middlegame was ending, and that it was time to bring out the big guy!
