### Engine Brake Elf

It is advisable to check the state of the brake fluid every 10,000 km. As a general rule, brake fluid should be replaced every 50,000 km (or every 2 years). Your vehicle's service manual will give you more precise information about how frequently the brake fluid should be checked and changed and what type of fluid should be used.

You'll need a helper to push on the brake pedal. Starting at the passenger rear open the bleeder screw and have your helper push down slowly on the brake pedal. Close the bleeder and have the helper let up on the brake pedal. Repeat this process until either there is no more air coming out of the bleeder or the fluid looks clean.
