Engineering, Procurement and Construction Management Agreement

Engineering, procurement, and construction (EPC) contracts are the most common form of contract used to undertake construction works by the private sector on large-scale and complex infrastructure projects. Under an EPCC contract a contractor is obliged to deliver a complete facility to a developer who need only turn a key to start operating the facility, hence EPCC contracts are sometimes called turnkey construction contracts.

Engineering, procurement, and construction - Wikipedia

Engineering, Procurement, and Construction Contracts or EPC Contracts are construction contracts that enjoy almost universal inclusion in project finance documents. They have emerged as the construction contract of choice in project financings that involve major international development projects. The increasing popularity of EPC Contracts is not due to the turnkey delivery method, which is the reason most often cited, although turnkey delivery is an appealing feature in EPC Contracts.

EPC Contracts - Engineering Procurement Construction Contracts

Although the engineering, procurement and construction (EPC) contract and the engineering, procurement and construction management (EPCM) contract have been present in the construction sector for many years, there remains confusion as to the fundamental differences between these contracts, the role each party is required to play, and when to use one contract over the other.

EPC or EPCM contracts? - Hogan Lovells

EPC stands for Engineering, Procurement, Construction and is a prominent form of contracting agreement in the construction industry. The engineering and construction contractor will carry out the detailed engineering design of the project, procure all the equipment and materials necessary, and then construct to deliver a functioning facility or asset to their clients.

Engineering Procurement and Construction Management Contract. Engineering Procurement and Construction Management contracts (EPCM contracts), like Engineering Procurement and Construction contracts (EPC contracts) are similar to design and build contracts. In that there is a single point of responsibility for the design and construction of the project, but generally, the client has less say over the design of the project than on a design and build project, and the contractor takes more risk .

Consultant Professionals | Office of General Services

"Engineering, Procurement, and Construction" EPC is a particular form of contracting arrangement used in some industries where the EPC Contractor is made responsible for all the activities from design, procurement, construction, to commissioning and handover of the project to the End-User or Owner.

What is the difference between an EPC and a Turnkey Projects?

Procurement routes are usually dealt with by a normal contract, a single-stage design and build, a two-stage design and build, or a management contract. All of which have different factors into why a person might select a specific piece.

Construction Procurement

Today's Engineering, Procurement and Construction (EPC) projects are becoming more complex and more implemented on a much larger scale, with large contract values. Companies need to have a clear strategy on how to draft, manage and negotiate their EPC contracts to align expectation and Bridging the Engineering and Contract worlds in asset intensive projects in the current climate, All companies involved in delivering capital projects need to pay a closer attention to managing cost overruns.
