that is both firmly science-based and also genuinely patient-centered.

Values-Based Practice: A New Partner to Evidence-Based ...

In other words, all practice is primarily values based, and as part of that we value the contribution that evidence of certain kinds can make to our clinical decision making. In working with our clients, we need to pay attention to both evidence and values, and we need to do this at the macro and the micro level in each case.

Working with values in clinical practice

One reason is likely to be the importance of values awareness. As values-based practice is premised on a mutual respect for the diversity of values, clinicians need to develop the skills to ascertain patient values and to get in touch with their own beliefs and preferences in order to understand those at play in any consultation.
