analysis alone. Hence, synthesis is required following analysis. Synthesis. Synthesis refers to the process of combining the fragmented parts into an aggregated whole. It is an activity that is done at the end of the scientific or creative inquiry.

Design Thinking - Analysis Vs Synthesis - Tutorialspoint

Analysis vs. Synthesis. Difference between Analysis and Synthesis: - Analysis is a process of deduction or decomposition in which we reduce and examine something part by part. When it is analyzed, general ideas and concepts are broken down into smaller fragments, in order to arrive at a better understanding. Synthesis, on the other hand, is the solution between a series of conflicts between the thesis and the antithesis; the synthesis has as its final objective to make a new proposal, in ...
