Java 8 in Action: Lambdas, Streams, and functional-style ...

Java 8 in Action is a clearly written guide to the new features of Java 8. It begins with a practical introduction to lambdas, using real-world Java code. Next, it covers the new Streams API and shows how you can use it to make collection-based code radically easier to understand and maintain. It also explains other major Java 8 features including default methods, Optional, CompletableFuture, and the new Date and Time API.

Manning | Modern Java in Action

Java 8 now brings in a zoo of names like BiConsumer for Action<T, T2> and, because Java does not allow primitive type arguments, BiIntConsumer. The "zoo", though, is not very big, and I am not aware of a library that expands it. There was a wonderful proposal for function type literals like (int, int) => void but it was not adopted.

Amazon.com: Customer reviews: Java 8 in Action: Lambdas ...

Tips and best practices on using Java 8 lambdas and functional interfaces. ... With this approach, the lambda is a self-explanatory construction, which declares what action should be executed with what data (in the case of lambdas with parameters). If you have a large block of code, the lambda's functionality is not immediately clear.
