Harley-Davidson Introduces New Factory Re-built Engine ...

The Harley-Davidson Milwaukee-Eight engine is the ninth generation of "big twin" engines developed by the company, but only Harley's third all-new Big Twin in 80 years, first introduced in 2016. These engines differ from the traditional Harley Big Twin engines in that there are four valves per cylinder, totaling eight valves, hence the name.

Harley-Davidson Milwaukee-Eight engine - Wikipedia

A new Harley-Davidson motorcycle begs to be ridden, but simply jumping on a new bike and riding without a plan for properly breaking in the new engine can lead to long-term mechanical problems. An engine that is not correctly broken in can be subject to premature component failure, excessive oil consumption and inadequate power production.
