Gate Operators and the ANSI/ UL 325 Standard

Improve public safety by referencing NFPA 54/ANSI Z223.1, 2021 edition, for the latest criteria for the acceptable use of gas in homes and buildings. From carbon monoxide poisoning to the risks of fire and explosion, there are many hazards inherent with

the utilization of gaseous fuels.

NFPA 54/ANSI Z223.1, National Fuel Gas Code

1.1* Scope. A.1.1 The following is a suggested procedure for determining the Code requirements for a building or structure:
(1) Determine the occupancy classification by referring to the occupancy definitions in Chapter 6 and the occupancy Chapters 12 through 42. (See 6.1.14 for buildings with more than one use.)
(2) Determine if the building or structure is new or existing.

NFPA 101®: Life Safety Code®

Revisions to NFPA 13-2019 are more explicit in outlining coverage requirements by refining or adding to the standard's language. Many of the clarifications included in this latest edition of the standard acknowledge common questions asked to sprinkler system designers by the larger design community and amend or supplement language to address these questions without ambiguity.
