Boot Environment (BE) A BE is a bootable instance of an Oracle Solaris 11 operating system plus any other application software packages installed into that image. System administrators can maintain multiple BEs on their systems, and each BE can have different software versions installed. With multiple BEs, the process of updating software becomes a low-risk operation because system administrators can create backup BEs before making any software updates to their system.

### Managing boot environments in Solaris 11 - The Geek Diary

Click an Oracle Solaris 10 OS global zone in the Assets tree to view the Boot Environment in the center pane. Click the Boot Environment tab. Existing boot environments for the OS appear in the center pane. To create a copy, or clone, of the existing active boot environment, click the Create icon.
