Why Information Grows The Evolution

Information grows since matter can compute in an iterative process that uses the information embedded in solids to transform energy into different solids and new information. Computation happens in plants or bacteria, but the human brain is the ultimate incarnation of the computational capacities of matter.

Why Information Grows Quotes by César A. Hidalgo

Conveying know-how is difficult, and becoming more so as time goes by and the economy becomes more diverse and complex. The "computational capacity" of the economy needs to grow, but it is constrained by the ability for knowledge and know-how to be embodied in networks of people - hence the value of trust, as it makes that easier.
