All radios produced during the first half of the 20th century were tube radios, since transistors were not invented until 1947 and did not start to replace tubes in radios until 1954. Which means that whether your antique radio is a cathedral or a console, an Art Deco beauty made of wood or Bakelite, its guts are filled with tubes. The originals of the vacuum tube, or valve as it's called in ...

Antique Tube Radios | Collectors Weekly

Early in their business life Mathews and Hassel began the long series of radio "firsts" that has become a Zenith tradition. One of their first ventures was construction of a long wave radio receiver for the Chicago Tribune, which was used to pick up news dispatches about the Versailles Peace Conference from a long wave station in France.
